PROFESSIONAL SUMMARY

AI & ML graduate with hands-on experience in data analysis, statistical modeling, and model evaluation using Python (Pandas, NumPy, Scikit-learn) and SQL. Skilled in exploratory data analysis and building interactive dashboards in Power BI and Tableau to turn data into clear, actionable insights. Co-author of a peer-reviewed publication on machine learning model evaluation. Collaborates well with others and quickly picks up new tools and methods to meet project goals.

TECHNICAL SKILLS

- **Data Analysis:** SQL, MySQL, Python, Pandas, NumPy, Microsoft Excel
- **Visualization:** Power BI, Tableau, Matplotlib, Seaborn
- **Machine Learning:** Scikit-learn, TensorFlow, PyTorch
- **Languages & Tools:** Python, Java, Git, GitHub, Jupyter Notebook, Google Colab

PROJECTS

Wine Market Analysis: Price, Region & Grape Variety

- Analyze wine pricing, critic ratings, geographical regions, and grape varieties using Python, Pandas, and NumPy to identify market patterns and pricing differences.
- Perform exploratory data analysis and SQL-based analysis using MySQL to compare regional pricing, rating distributions, and comparatively affordable, highly rated wines.
- Develop an interactive Power BI dashboard with Excel-based reporting to visualize pricing trends, compare wine segments, and support data-driven product positioning decisions.

Medicinal Plant Price Trend Analysis

- Analyzed historical medicinal plant price data (2017–2025) from the Ministry of AYUSH's e-CHARAK portal to investigate market-level price variations, historical trends, and reporting coverage.
- Developed a Python-based data processing pipeline for data cleaning, standardization, validation, and exploratory data analysis, and used MySQL to analyze 374,830 observations across 110 medicinal plants.
- Built an interactive two-page Power BI dashboard with plant and market filters, KPI cards, and price-trend visualizations to support market comparisons and data-informed sourcing assessments.

IT Asset Management Dashboard

- Analyzed IT asset data using Python and MySQL to monitor asset lifecycle status, hardware depreciation, software license utilization, and compliance risks.
- Developed interactive Power BI dashboards to visualize asset inventory, financial metrics, warranty coverage, and software license renewal costs.
- Generated actionable insights into asset utilization, expired licenses, and maintenance requirements to support cost optimization and data-driven IT asset management decisions.

ACHIEVEMENTS & PUBLICATION

- **National Rank 60/150:** TechXcelerate 24-Hour Hackathon, BITS Pilani, Goa (AI/IoT track).
- **Co-author:** "Wine Oracle: A Clandestine Journey into Quality Prediction with Neural Alchemy," REST Journal on Data Analytics and Artificial Intelligence, Vol. 3, Issue 2, 2024 (ISSN-indexed). DOI: 10.46632/jdaai/3/2/13.

EDUCATION

B.E., Computer Science and Engineering (AI & ML) *2022 to 2026*
Vel Tech High Tech Dr. Rangarajan Dr. Sakunthala Engineering College, Chennai | CGPA: 7.9 / 10
HSC & SSLC, State Board: The Ashram Matriculation Higher Secondary School | HSC (2022): 73.16%, SSLC (2020): 91.4%
